

Changi Airport, Singapore

144,000m² Duralay Durafit 500.

Changi Airport, is one of the world's busiest and most renowned international airports. It is located in Changi, Singapore, and serves as a major transportation hub for both domestic and international flights with over 68 million visitors each year, making it one of the most advanced and well-connected airports globally.

This airport consists of 4 huge passenger terminals and the jewel, a multi-story indoor garden and entertainment complex with attractions like the Rain Vortex (the world's tallest indoor waterfall), bright greenery, restaurants, shops, and a hotel.

Changi Airport is not just a place for travelers to pass through; it's an attraction in itself, offering a unique and world-class experience for visitors and passengers alike. Its commitment to innovation and passenger comfort has made it a model for airports around the world.

Over the past 20 years, Interfloor was proud to be chosen to supply 144,000 sqm of our Durafit 500 underlay for the departure lounges and air bridges in Terminals 1, 2, 3 & 4 at the world famous Singapore Changi Airport.

With that kind of foot traffic our Durafit range of crumb rubber underlays was the perfect solution, as crumb rubber is without doubt the most durable underlay available.

With an End Use Classification (BS 5808: 1991 : HC/U) of heavy contract use, Durafit 500 has 93% recovery from compression as well as containing over 65% recycled materials.
